

Annuals Losing the Wow Factor?

Annuals lose appeal due to water restrictions. Let Stay Green bring new life to your landscape with succulents & perennials!

Mandatory water restrictions in many areas are down to 2 days a week, diminishing the aesthetic appeal of water-hungry annual display beds and containers.

California-friendly succulents and perennials are a perfect solution, as they are adapted to the area's climate. Replacing annuals provides numerous benefits!

SUCCULENTS & PERENNIALS

- Can thrive and flower under the strict water schedules
- Reduction in water requirements equals savings on water bills
- Showcase your commitment to being environmentally responsible to the community
- Can give updated modern appearance
- Reduced labor for containers on a hand watering system
- Less expense from a reduction in change outs needed
