

Seasons Of Care

A QUARTERLY REPORT OF YOUR STANDARD SERVICES FROM STAY GREEN INC.

Stay Green's Standard Summer Services

There's No Summer Vacation For Stay Green.

Your landscape demands attention during the year's hottest months. We're here to make sure it gets exactly what it needs. Whether it's proper watering or regular mowing and trimming, Stay Green is hard at work all summer long.

Mowing

Weekly trimming promotes a healthier lawn that grows deeper, stronger roots and requires less water.

Water Conservation

We regularly inspect your irrigation system and immediately repair any leaks. That eliminates waste and ensures thirsty lawns and shrubs get water when they really need it.

Shrubbery

Fast-growing shrubs need frequent trimming, and we prefer to do it by hand because it's easier on the plants and reduces carbon emissions from noisy gasoline-powered trimmers.

Fertilization

Lawns, shrubs and trees work hard growing during the summer, so we keep them well fed to ensure they look their best all season long.

Mulching

Not only does mulch add to the beauty of your landscape, but also it slows weed growth, keeps soil cooler during the hot summer months, and saves water.
