

# Are Your Shrubs Unruly?

A little TLC can go a long way toward rejuvenating shrubs. Stay Green's team of experts can renew your plants!

To keep a landscaping looking well-kept and plant material healthy, it is necessary to routinely hard prune the shrubs.

Hard pruning is a drastic pruning that removes old, overgrown limbs so the plant can grow new vigorous branches in their place.

## Tough Love Needed

### HARD PRUNING

- Helps keep shrubs from overgrowing their surroundings
- Removes thick unproductive branches
- Renews plant
- Promotes flowering
- Is done before the buds begin to open
